

BATTERY CHARGERS

BATTERYCHARGE RANGE

BATTERYCHARGE15

15 AMP 50-500Ah Batteries

BATTERYCHARGE25

25 AMP 80-800Ah Batteries

KEY FEATURES

- Designed and Made in Australia
- 7-stage Micro Digital Processor
- Suitable for charging Lead Acid, AGM, Gel, Calcium
- Includes LITHIUM (LiFePO₄) charging profile
- Adjustable Amp output
- Durable design
- Power Supply Mode

A range of automatic multi-stage battery chargers, with adjustable output current, the BatteryCharge range delivers high-performance intelligent charging.

BATTERYCHARGE4

8 CHARGE STATES

12-120Ah Batteries

BATTERYCHARGE7.5

10 CHARGE STATES

10-240Ah Batteries

KEY FEATURES

- Multi-stage charger with adjustable output
- Recharge Lead Acid and Lithium Batteries
- LCD display to monitor charge progress
- Overload and reverse connection protection
- Durable design
- Large clamps for easy battery connection

MINI BOOST

MINIBOOST

The MiniBoost is a compact DC-DC charge-booster for recreational vehicles.

It charges the house battery of your caravan or camper trailer directly from the towing vehicle's electrical system, even when the voltage delivered from the tow vehicle is lower than usually required.

The MiniBoost provides a 2-stage charging profile, delivering an efficient and controlled current until the house battery is charged.

The MiniBoost has been specifically designed to work with the BatteryPlus35 and J35 Battery Management Systems.

KEY FEATURES

- DC-DC charger specifically for RV applications
- Input over-current and reverse voltage protection
- Output over-current and short circuit protection
- Output reverse connection protection
- BMPRO signature durability and ease of use

MINIBOOSTPRO

Rapidly charge your deep cycle battery while you drive

MiniBoostPRO is a compact Lithium DC-DC charger with solar input, specially designed for the RV market. The MiniBoostPRO battery charger offers effective charging of your caravan, 4WD or camper trailer's house battery from the towing vehicle's electrical system. Blending both solar and auxiliary inputs, the MiniBoostPRO provides a combined charging current of up to a maximum of 30A, with a preference to solar. It features proprietary technology designed to charge from modern car alternators. It can be used with LiFePO₄ batteries as well as with traditional lead acid batteries.

KEY FEATURES

- 30A multi-stage lithium DC-DC charger
- Dual input solar/aux up to 30A
- Multi-battery chemistry selector
- Suitable for modern smart alternators
- BMPRO BP35 and J35 compatible
- BMPRO signature durability and ease of use

Battery Management Systems give you control over your caravan's house battery and 12V appliances.

BMPRO offers all-in-one solutions which include power supply and distribution board for 12V loads plus a smart charger and multiple battery protection features with built in LVD and automatic fuses.

Designed and manufactured in Australia, caravan power and battery management systems are highly reliable and efficient solutions for the recreational vehicles. Used together with one of BMPRO battery monitors, they provide RVers with detailed knowledge and control over their caravan power requirements.
