CAMEC DIGITAL INSTANTANEOUS GAS HOT WATER SYSTEM

051459 13KW GAS WATER HEATER WHITE DOOR \$945.00

051460 13KW GAS WATER HEATER BLACK DOOR \$945.00

Instantaneous Water Heater system is an economical solution for RV's to supply constant hot water. Unlike 240V systems that draw extensive current, clever design of this system means it can operate for many hours at maximum heating capacity from just one 9kg gas bottle! The digital controller gives you flexibility to set your desired water temperature plus peace of mind knowing the water temperature can be controlled so it will not be too hot for children. One of the key benefits of an RV instantaneous water heater is that gas is only used when water flows (the water heater is activated by the initial flow of water through the system). In other storage tank systems, energy is required on a continual basis to keep the water stored at the desired temperature and with an instantaneous system, you are able to use all of the available water in your RV's storage tank(s).

FEATURES

- Designed specifically for RV use
- Australian Gas and Watermark Approvals
- Operates from 12V DC & Gas
- Continuous hot water flow
- Remote digital temperature controller with error code display and on/off switch
- Up to 60% less gas consumption than regular tank models
- No anode to replace
- Door lock compatible with Camec One Key System
- Easy to install and suits most existing water heater cut outs
- Patented rain protection exhaust
- Low power and gas usage

SPECIFICATIONS

- Super-efficient 46,500BTU heating power
- Weight 12.1kg
- Installation cut-out dimensions: 330mm(w) x 330mm(h) x 380mm(d)
- Water temperature selectable from 35-50°C
- Minimum starting water flow: 1.5l/min
- Shut down water flow: 1.0 l/min
- Temperature rise at 5.0L/min water flow: 37.7°C
- Power requirement: 10.5-15V DC
- Maximum current 1.5A
- Nominal Gas Consumption (MJ/h): 49.1
- Efficiency: >90%

EGEN 12V 200W SOLAR PANEL

054344

The eGen 12v solar panel is designed for high efficiency and reliable energy generation. With optimized voltage and current ratings, this panel is an excellent choice for caravans, motor homes, marine and offgrid systems. Its durable construction ensures longevity and superior performance.

- High Efficiency: With high-quality monocrystalline cells, this solar panel offers superior energy conversion, ensuring you get the most out of every ray of sunshine.
- Durable & Weather-Resistant: Built to withstand the elements, this solar panel features robust construction and is designed for long-term performance, even in harsh outdoor conditions.
- Installation & Compatibility: Compatible with PWM and MPPT charge controllers and can be easily installed on caravans, motorhomes, boats, and other mounting surfaces.
- Optimal for Off-Grid Power: The 12V 200W solar panel is the perfect solution to keep your battery charged and your appliances running smoothly.

EGEN HIGH-VOLTAGE 200W SOLAR PANEL

054345

Camec's eGen high-voltage solar panel has been designed for reliable and efficient off-grid power generation. With advanced technology, this panel delivers a high voltage output, maximising energy conversion for your recreational vehicle. Its durable construction ensures long-lasting performance in a variety of environmental conditions.

- Higher Efficiency: Reduces power loss due to lower current, leading to improved overall system efficiency.
- Reduced Wiring Size: Lower current allows for smaller diameter wire to be used.
- Better Performance in Low-Light Conditions: High-voltage panels are more effective in cloudy or shaded environments.
- Can be used on voltage systems ranging from 12v - 48v

\$205.00
SAVE \$51.60

EGEN 30A MPPT SOLAR CONTROLLER

054343

The eGen 30A MPPT Solar Charge Controller is a highly efficient and versatile controller designed for off-grid solar power systems. It is equipped with Maximum Power Point Tracking (MPPT) technology, which optimises the energy produced by your solar panels, ensuring maximum efficiency, even in varying sunlight conditions. This controller is compatible with a wide range of battery voltages, supporting 12V, 24V, 36V, and 48V systems. The unit has charging cycles to suit all battery chemistries, including a user programmable option. Android or iOS app available.
